PROFILE

Currently in the process of obtaining a Bachelor's degree in "DevOps Application Designer and Developer", I'm actively looking for an opportunity to join a new work-study program with a view to obtaining a Master's degree in cybersecurity. Passionate about this field since childhood, curious and motivated by the desire to learn constantly, pursuing my studies in cybersecurity represents for me a logical and natural next step in my career path.

EXPERIENCES

APPRENTI PROGRAMMEUR WEB & APPLICATIONS

GLANUM | 2023 - 2024

- **Setting up databases:** Development and optimization of efficient data structures to meet the specific needs of customer projects.
- **System design:** Development of Conceptual Data Models (CDMs), using the principles of Domain-Driven Design (DDD) and Model View Controller (MVC) principles to structure software solutions.
- **Software project management:** Implementation of upgrades and bug fixes on customer projects, ensuring continuous improvement and optimum customer satisfaction.
- **Development and deployment:** Work in various development environments, automated and manual deployment (SSH), using Docker containers, version control tools (Git) and CI/CD pipelines for continuous seamless integration and delivery.
- **Automation and maintenance:** Creation of commands executed via CRON to automate applications, implementing algorithms, interface middleware and services with dependency injection, with the aim of producing secure, scalable and maintainable code.
- **Use of ORM:** In-depth experience with Eloquent ORM to manipulate and query databases efficiently and intuitively.
- **Agile methodology:** Active participation in an Agile environment, collaborating teams to ensure rapid response to project requirements and continuous process improvement.

BACK-END DEVELOPER INTERN

FLOW'S BY ESTHER | 2022 - 2023

Development of the "Slash" application presented at French Tech Grande Provence.

- **Multifunctional management platform:** Design and implementation of a platform for rapid tracking of personal and professional time, as well as management of tasks to be carried out on the same project.
- **Analysis and reporting:** Development of reporting and invoicing sections offering overviews of activity-by-activity balances, with dynamic graphs for calculating hourly rates, as well as revenues and expenses by project.
- **Optimized productivity:** Creation of a tool enabling users to plan their work plan their work in advance, reducing their mental workload and increasing their productivity.
